

TCCAGExx048 update notification

October 28th 2014

Dear Valued Customer,

A new version of Opto Engineering TCCAGExx048 models has been released: it now integrates a highly transmissive diffuser for the backlight unit, greatly increasing light output.

TCCAGExx048 is a bi-telecentric system for multiple side imaging and measurement at 90° designed to fully inspect and measure parts from their side without any need of rotation.

- **Orders**

- Orders with shipment date starting from 01/01/2015 will receive new TCCAGExx048
- Orders with shipment date until 31/12/2014 will receive old TCCAGExx048

[Contact](#) our sales engineers ahead of such dates to discuss about your specific needs.

- **Demo units**

- Demo units for new TCCAGExx048 will be available from 01/12/2014: after this date, only demo units of the new version will be shipped
- Demo units for old TCCAGExx048 are available until 30/11/2014: after this date, demo units of the old version will no longer be shipped.

Please note that mechanical dimensions are unchanged. Due to the increased light output please check compatibility of new TCCAGExx048 into existing systems.

All enquires and requests should be directed through the normal sales channels. Please [contact](#) our sales engineers to discuss about your specific needs.
